

Thurston Groves HOA Monthly Waterway Inspection Report

Reason for Inspection: Routine Scheduled - Monthly

Inspection Date: 5/24/2018

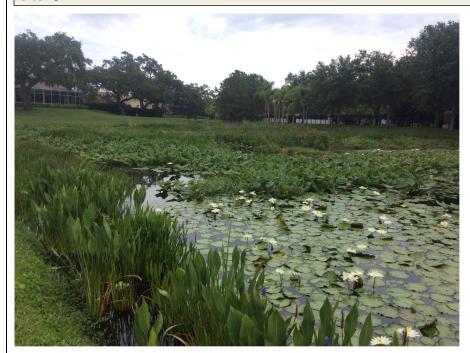

Prepared for:

Mr. David Fedash, LCAM
Ameri-Tech Property Management, Inc.
24701 US Highway 19 North, Suite #102
Clearwater, Florida 33763

Prepared by:

Chris Cipollina, Account Representative/Biologist
Aquatic Systems, Inc. – St. Pete Field Office
Corporate Headquarters
2100 N.W. 33rd Street, Pompano Beach, FL 33069
1-800-432-4302

Site: 1

Comments: Normal growth observed

Throughout the May Inspection of the waterway at Thurston Groves, it was observed that new growth undesired vegetation was present within the beneficial plants along the perimeter of the site, as well as within the littoral shelf and upon the exposed banks of the site.

Management Summary

The following observations were made during the May Account Inspection of Thurston Groves:

- New growth of Primrose, Alligator Weed, and Torpedo Grass were present within the beneficial vegetation along the perimeter of the site, upon the exposed banks, and within the littoral shelf.
- The water level had risen slightly due to recent precipitation events.
- The site had been maintained free of undesired algal growth.
- The burrowing behavior of the Plecostomus populations present was not observed during this inspection.
- Water quality remained high.
- The beneficial vegetation was in excellent health, and continue to grow and spread along the perimeter and throughout the littoral shelf.

Recommendations/Action Items

During our upcoming scheduled visits, Aquatic Systems, Inc. will focus on the following:

- Carefully spot spray the undesired growth of Alligator Weed, Primrose, and Torpedo Grass along the perimeter of the site, within the littoral shelf, and on the exposed banks of the site.
- Continue to monitor for regrowth of submersed weeds and algae, performing additional treatments as observed to maintain current conditions.
- Closely monitor the water level and water clarity as more frequent precipitation events are anticipated.
- Clear the control structure of flow-restricting materials.
- Monitor the burrowing behavior of the Plecostomus populations.
- Continue to foster the growth and establishment of Florida Native Beneficial Plants.

Aquatic Systems, Inc. will continue to care for the waterway within the Thurston Groves Community.
